Subject: Billboards (W912DW-16-C-0012)

Eric,

We need to visit the topic of billboard demolition. Kim Prestbo contacted me today to ask me when we would have some degree of certainty as to whether or not all billboards will need to be demolished, or whether there may be some that could potentially remain. We recognize that this will be dictated by the alignment of the GWCS and SBCW which are not yet designed, as well as the access and work area requirements for the construction activities that will be performed to install the GWCS and SBCW. Our guidance to date has been to assume that all billboards will be demolished and disposed of.

EPA and IDEQ are preparing to notify the billboard owners and to let them know that if the billboard owners want to salvage any the billboards, they will need to remove them themselves before AmecFW mobilizes next spring. Kim raised a valid concern with the timing of that notification. If there is a possibility that any billboards may be able to remain intact, the owners would like to know so that they do not unnecessarily dismantle and remove them. We recognize that AmecFW will not be able to provide complete assurance until DP4 is closer to completion. The concern is that the Intermediate DP4 package won't be submitted until late October, and if the Govt waits until then to notify billboard owners, that puts the owners in the position of having to dismantle their billboards in adverse winter conditions.

Now that AmecFW has collected survey information, have you made any progress on determining if there is a potential that any of the billboards will be able to remain? Please include this on the agenda for Monday's status meeting.

Thanks,
Rod Zion
